Caution: Before using your phone, please read the safety, regulatory and legal information provided with your product.

This product meets the applicable national or international RF exposure guidance (SAR guideline) when used normally against your head or, when worn or carried, at a distance of at least 20 mm from your body. Motorola has tested and verified its product complies with the safety requirements of all governing agencies. To maintain compliance with RF exposure guidelines, use only Motorola-supplied or compatible accessories and do not modify the device in any way. This device also includes a considerable safety margin designed to assure the safety of all persons, regardless of age and health.

Protect your phone with Moto Care Protection. Visit motorola.com/protectmydevice for more information. (U.S. only)

At a glance
Let's get started! We'll guide you through startup and tell you a bit about your phone's features.

Note: Software updates happen frequently, so your phone may look a little different.

Sign in
Start by signing in with your Google™ account to get the most out of your device. If you use Gmail™, you already have a Google™ account—if not, you can create an account during setup. Signing into your Google account lets you access, sync, and backup your stuff. See your Google apps, contacts, calendar, photos, and more.

Puts the cards & power on
Put in the cards & power on
Caution: Make sure you use the correct size SIM card, don’t cut the SIM card, and don’t use adapters with your SIM card.

Power on.
Press & hold Power until the screen lights up.

Put the SIM card into the tray with gold contacts facing up. Turn tray over to put in memory card.

Put the nano SIM and memory cards in.

Push the tray back into your phone with gold contacts facing up.

Use the tool to pop out the tray.

Press and hold Power until the screen lights up.

Start
Just follow the screen prompts to get started.

If you use Gmail™, you already have a Google™ account—if not, you can create an account during setup. Signing into your Google account lets you access, sync, and backup your stuff. See your Google apps, contacts, calendar, photos, and more.

Home screen & apps
From the home screen, you can explore apps, check notifications, speak commands, and more.

Add a shortcut:
Tap Apps, tap and hold an app, then drag it to your home screen.

Settings:
To change your Wi-Fi, display brightness, and more, swipe the status bar down with two fingers. To open more settings, tap .

Share your phone:
To add a guest user, swipe the status bar down with two fingers and tap .

Search by typing or say "OK, Google".
Tap Apps to see all your apps.
Swipe down with one finger for notifications or with two fingers for profiles and settings.
Touch and hold an empty spot to change widgets, wallpaper, and more.
Discover your Moto apps
Find it:
Apps > Moto

- **Action**: Learn how to open your camera with two twists of your wrist using Quick Capture.
- **Voice**: Set your custom launch phrase and control your Moto X with your voice.
- **Display**: See messages, calls, and other notifications—even if your phone is asleep.

*Note: Your phone may not have all features.*

Browse Photos
With two twists of the wrist and a tap on the screen, take crisp, clear photos with the 21 megapixel camera.

- **Launch it**: Even when your phone is asleep, open your camera with two twists of your wrist.
- **See it**: Swipe left for your photo gallery.
- **Share it**: View a photo or video from your gallery, then tap Share.

*Tip: Swipe right for effects and settings, like panorama.*

Want more?
- **Help is here**: Tap Apps > Help to get walk-through tutorials, how-tos, FAQs, or chat with people who can help, right on your phone.
- **Everything Moto X**: Get software, user guides, and more at www.motorola.com/mymotoxpure.
- **Accessories**: Get accessories for your phone at www.motorola.com.
- **Get apps**: Tap Apps > Play Store to buy and download apps.
- **News**: Here’s how to find us:
  - YouTube™: www.youtube.com/motorola
  - Facebook™: www.facebook.com/motorola
  - Twitter: www.twitter.com/motorola
  - Google+™: www.google.com/+Motorola/posts

Protective Bumper
We know the right case can be hard to find, so we’ve included an optional bumper to protect your phone without covering its premium design. Simply attach the bumper for extra protection.

*Caution: Don’t use tools to remove the protective bumper—doing so may damage your phone.*

Put on the protective bumper.
Put the top of the phone inside the protective bumper.
Press the rest of the phone into the bumper.

For Your Safety

**Warning:** Don’t try to remove or replace the battery yourself—doing so may damage the battery and could cause burning and injury. If your phone becomes unresponsive, try a reboot—press and hold the Power button until the screen goes dark and your phone restarts.

**Specific Absorption Rate (FCC & IC)**

YOUR MOBILE DEVICE MEETS FCC AND IC LIMITS FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (无线电波) recommended by the Federal Communications Commission (FCC) and Industry Canada. These limits are part of comprehensive guidelines and establish permitted levels of radio wave exposure for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The SAR limit for mobile devices is 1.6 watts/kg (W/kg) averaged over one gram of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. During use, the actual SAR values for your device are usually well below the values stated.

The highest SAR values under the FCC and IC guidelines for your device model are listed below:

<table>
<thead>
<tr>
<th>Model</th>
<th>Head SAR</th>
<th>Body-worn SAR</th>
</tr>
</thead>
<tbody>
<tr>
<td>XT1572</td>
<td>0.99 W/kg</td>
<td>1.10 W/kg</td>
</tr>
<tr>
<td>XT1575</td>
<td>0.99 W/kg</td>
<td>1.43 W/kg</td>
</tr>
</tbody>
</table>

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed. As a result, your device’s SAR value while in use is usually substantially below the applicable limits. SAR values may also vary depending on national testing standards.

Additional information can be found at www.motorola.com/rfhealth.

Usage
This phone supports apps and services that may use a lot of data, so make sure your data plan meets your needs. Contact your service provider for details. Certain apps and features may not be available in all countries.

Electronic Label

Your mobile device may use an electronic label that provides some regulatory information about the device. To see the electronic label, tap Apps > Settings > About phone > Regulatory information.
